

HOME PAGE

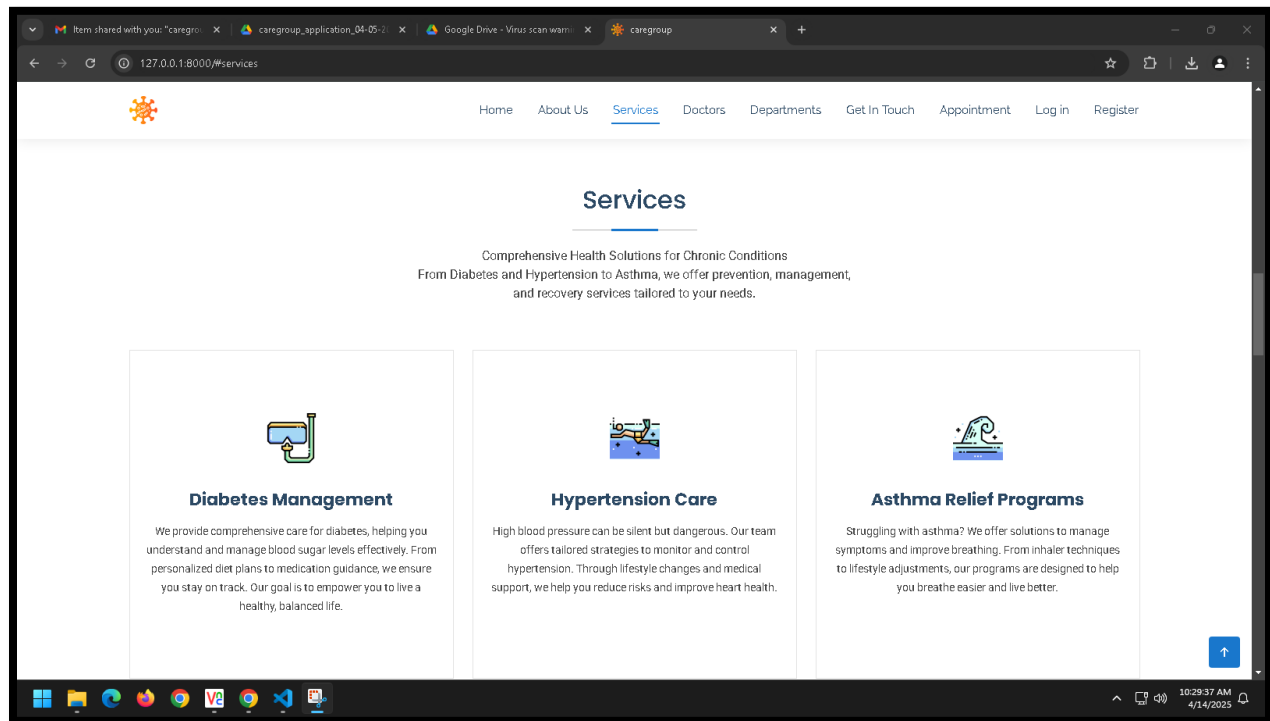

This is the homepage of the CareGroup health management system. It introduces the application with a clean and professional interface, designed to build trust and inform first-time users about the platform's purpose. The visual layout promotes healthcare accessibility and highlights the importance of digital health services. From here, users can choose to either register or log in, depending on their status. It sets the tone for the user experience by offering a calm and easy-to-navigate design that represents the medical field appropriately.

About Us Page

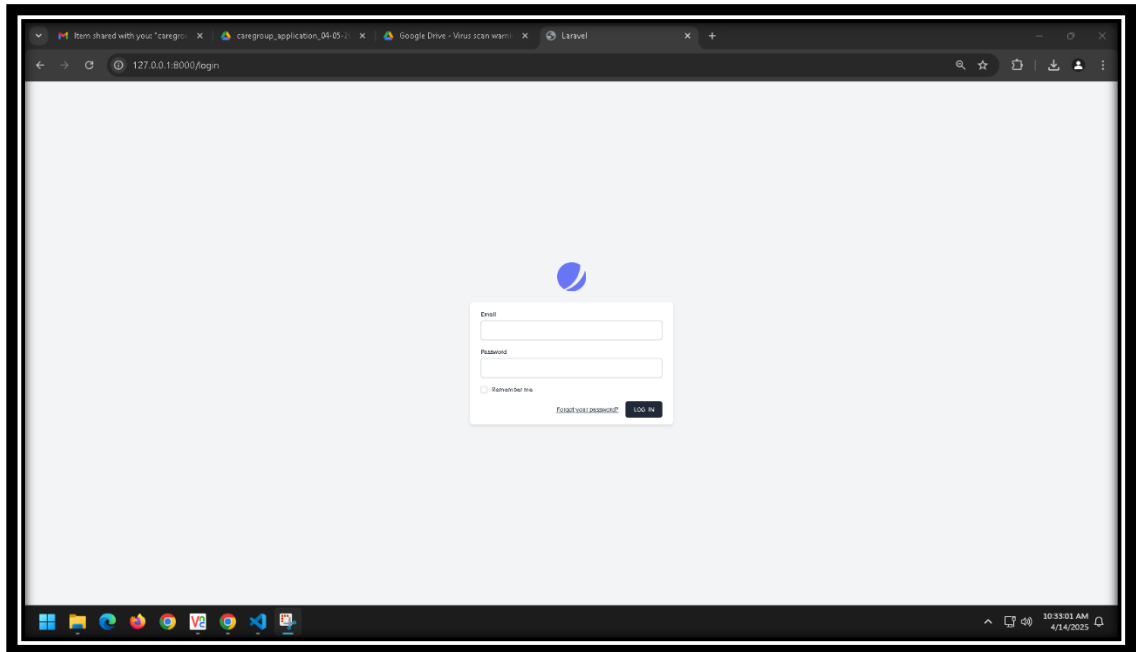

The “About Us” section gives a complete introduction to the CareGroup system. This platform is designed to improve the healthcare experience by connecting different types of users like doctors, patients, admins, and general users. It is a role-based system where each user gets access based on their role. The main purpose of this platform is to provide an organized way to manage appointments, view patient health details, assign doctors, and make medical communication easier.

SERVICES

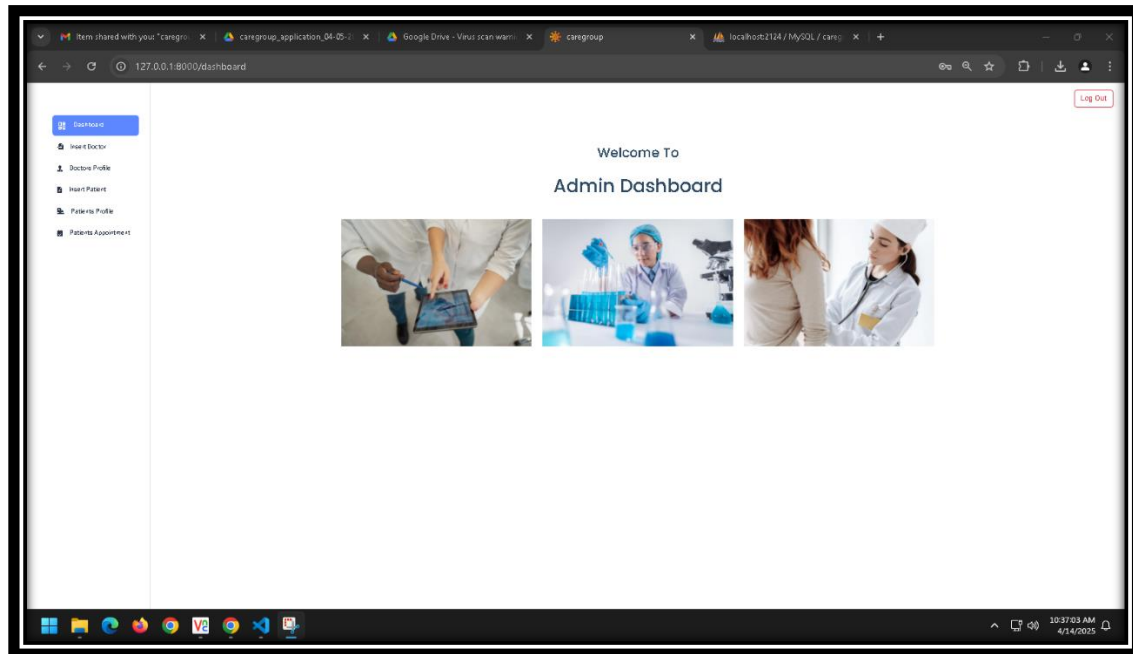

This screenshot displays the “Services” section of the CareGroup website, showcasing three major health programs: Diabetes Management, Hypertension Care, and Asthma Relief Programs. Each service provides detailed care strategies like blood sugar monitoring, blood pressure control, and asthma treatment guidance. The section emphasizes prevention, treatment, and long-term management of chronic conditions. It reflects the platform’s goal to deliver personalized healthcare solutions tailored to patient needs.

LOGIN PAGE

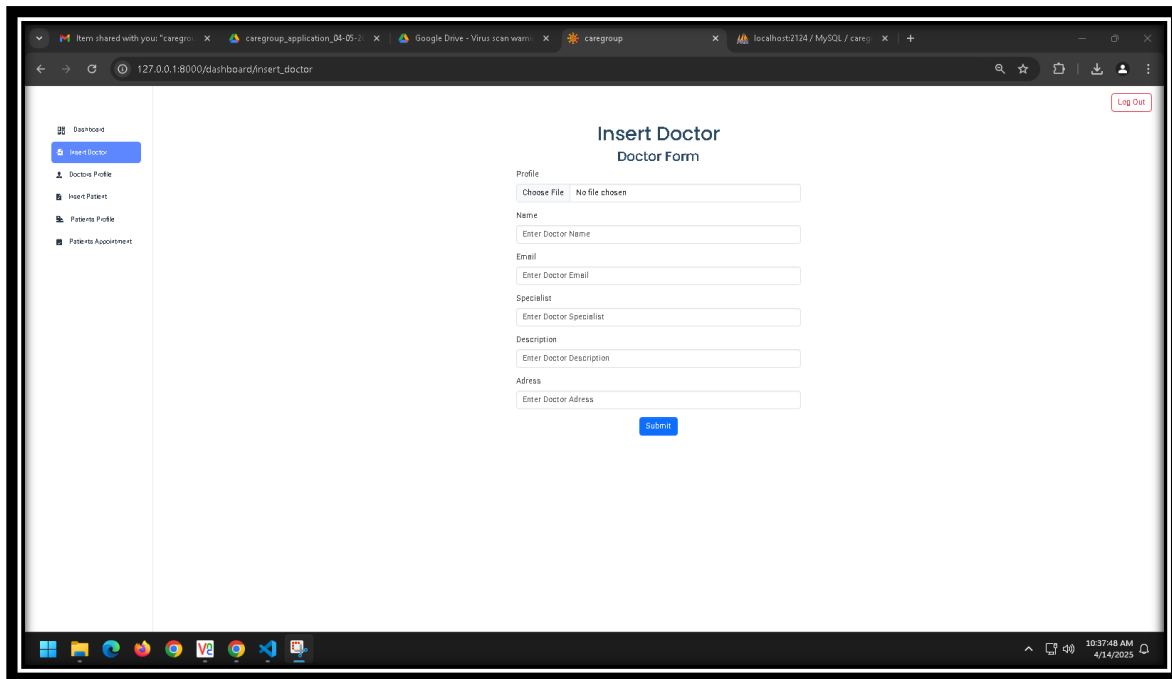

The login screen serves as the secure entry point into the system for all users, including Admins, Doctors, Patients, and General Users. Based on the entered credentials, the system verifies the user and redirects them to their role-specific dashboard. This ensures that each user only accesses the features intended for their role. The layout is minimal to reduce confusion, and the authentication process supports role-based routing. This section is crucial for enforcing access control, user privacy, and role separation.

ADMIN DASHBOARD

The admin dashboard is the control center of the application, offering full oversight of users, roles, and appointments. Admins can navigate to various sections such as user management, role management, and appointment listings. The interface is designed to display key metrics and user data in an organized manner. It allows the admin to monitor the system's activity and maintain operational flow. The layout supports quick decision-making through its clarity and comprehensive access.

INSERT DOCTOR (FOR ADMIN)

The screenshot shows a web browser window displaying the 'Insert Doctor' form within an admin dashboard. The browser's address bar shows the URL '127.0.0.1:8000/dashboard/insert_doctor'. The dashboard has a sidebar on the left with a menu containing 'Dashboard', 'Insert Doctor' (highlighted), 'Doctors Profile', 'Insert Patient', 'Patients Profile', and 'Patients Appointment'. The main content area is titled 'Insert Doctor Doctor Form'. It contains a 'Profile' section with a file upload button 'Choose File' and a text 'No file chosen'. Below this are several text input fields: 'Name' (with placeholder 'Enter Doctor Name'), 'Email' (with placeholder 'Enter Doctor Email'), 'Specialist' (with placeholder 'Enter Doctor Specialist'), 'Description' (with placeholder 'Enter Doctor Description'), and 'Address' (with placeholder 'Enter Doctor Address'). A blue 'Submit' button is located at the bottom right of the form. A 'Log Out' button is visible in the top right corner of the dashboard area. The Windows taskbar at the bottom shows the time as 10:37:48 AM on 4/14/2025.

This screenshot displays the “Insert Doctor” section available in the admin dashboard. It features a detailed form where the admin can add a new doctor to the system. The form collects essential data such as name, email, phone number, specialization, designation, and address. There is also an option to upload an image and add a brief description. This functionality ensures that the system maintains updated and verified doctor records, enabling proper assignment and access throughout the platform.

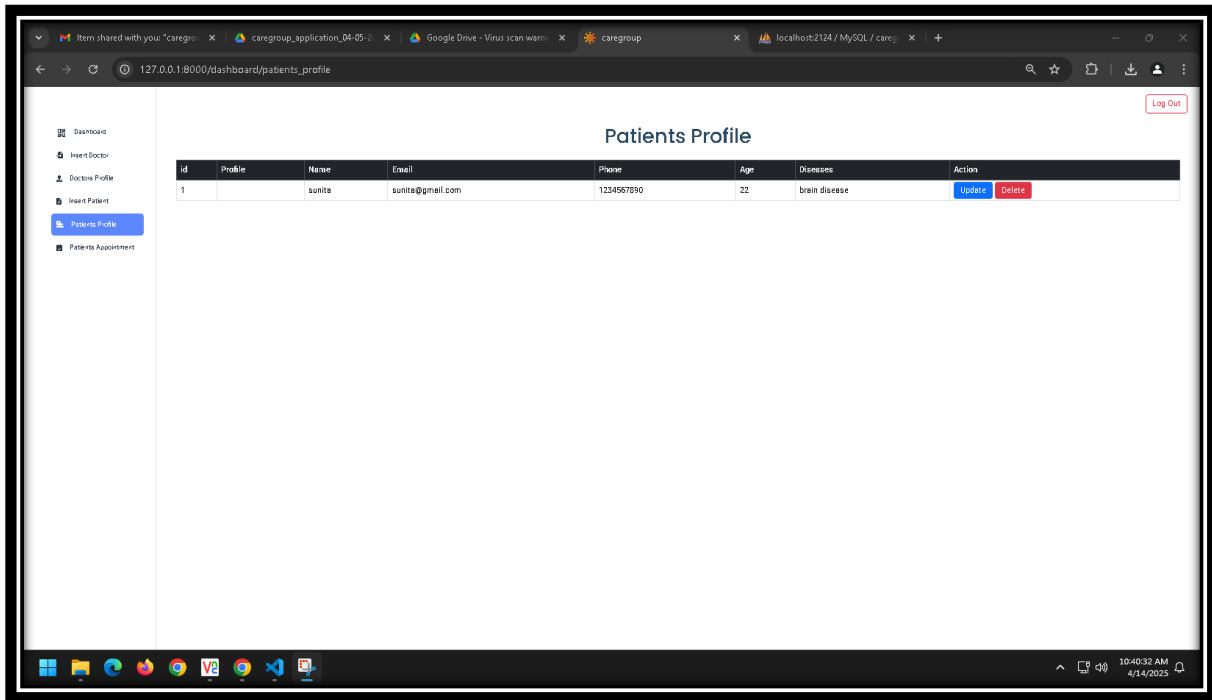

DOCTORS PROFILE (ONLY ADMIN CAN SEE)

Doctors Profile

id	Profile	Name	Email	Specialist	Description	Address	Action
1		Biama Mannan	biama@aptechgdn.net	physiotherapist	Professional Therapist	Saddar Karachi	Update Delete
2		Rehman Ali	rehman@gmail.com	Dermatologist	skin expert	karachi pakistan	Update Delete

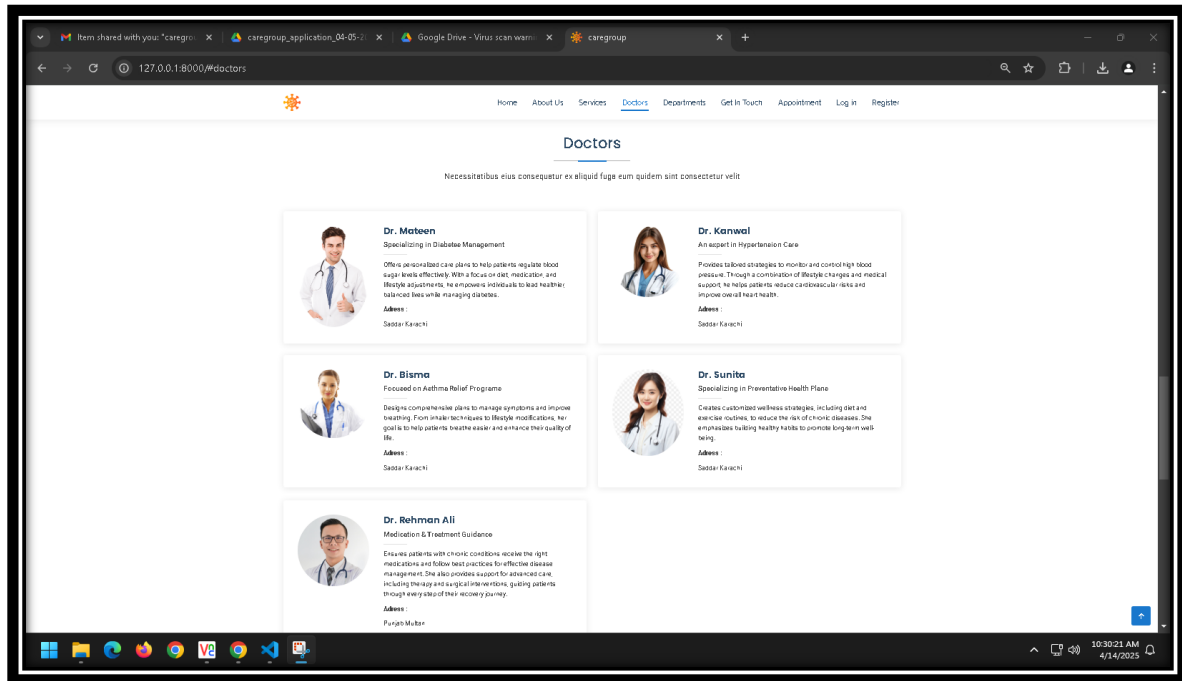

This screenshot shows the “Doctor Profile” section accessible to the admin. It provides a complete overview of all registered doctors in the system. Admin can view details such as doctor names, emails, specializations, and more. The interface may also offer edit or delete options, allowing the admin to manage doctor records efficiently. This section ensures that the healthcare database remains accurate, and helps the admin control which doctors are active on the platform.

PATIENTS PROFILE (ONLY ADMIN CAN SEE)

This screen displays a list of all registered patients, visible to the admin. It shows detailed patient information such as name, email, age, and medical condition. The admin can manage this data by editing or removing entries when needed. This section plays a key role in maintaining accurate patient records for effective healthcare service delivery.

Our Doctors

This screen displays a list of available doctors along with their names, specialties, and additional contact information. It helps patients browse and select a doctor based on medical needs. This level of transparency builds trust and aids decision-making. The layout organizes information cleanly to support comparison and selection. It strengthens user autonomy in healthcare choice.

User Dashboard (Appointment Booking Form)

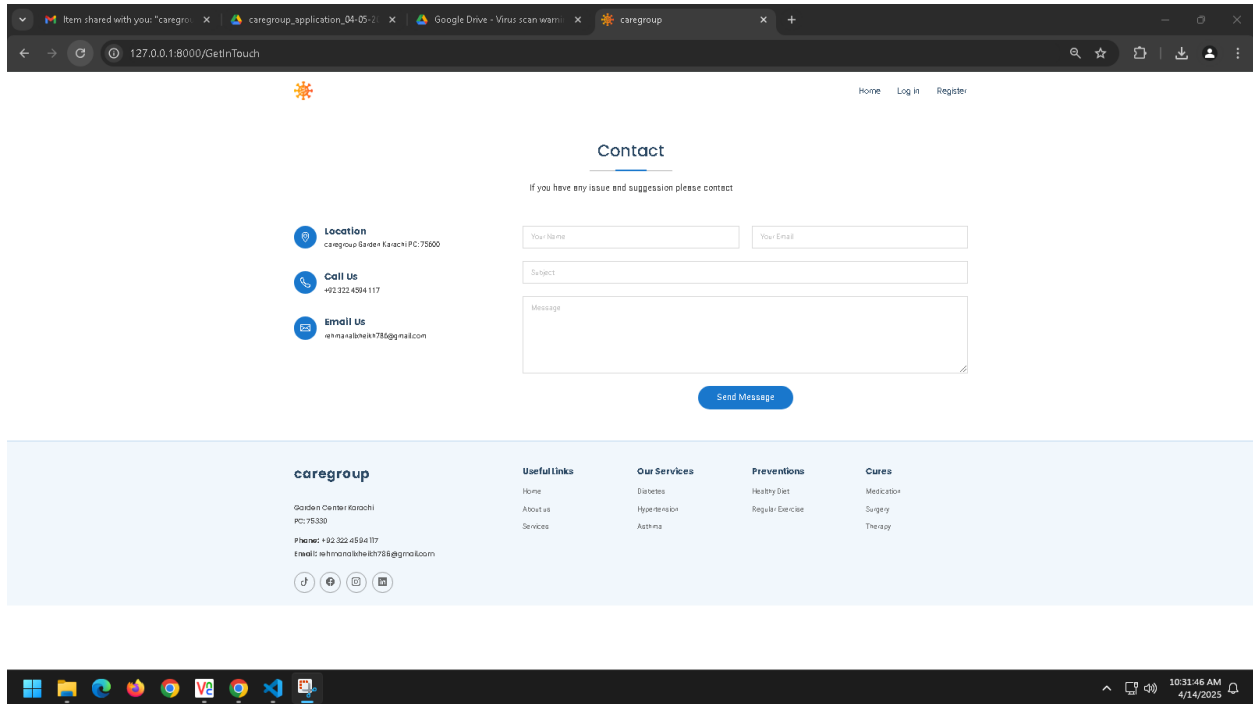

The screenshot displays a web browser window with the URL `localhost:8000/appointment`. The page features a header with a logo and a "Log Out" button. The main content area is titled "Appointment" and includes the instruction "Book your appointment about your disease". Below this, there is a form with the following fields:

- Your Name
- Your Email
- Your Phone
- Your Age
- Your Diseases
- Your Address
- mm/dd/yyyy (Date)
- -- (Time)
- Doctor's Name
- Message (Optional)

A "Submit" button is located at the bottom of the form. The footer contains the "caregroup" logo, contact information (Garden Center Karachi, PC: 75330), and several columns of links: "Useful Links" (Home, About us, Services), "Our Services" (Diabetes, Hypertension, Asthma), "Preventions" (Healthy Diet, Regular Exercise), and "Cures" (Medication, Surgery, Therapy).

This screenshot displays the user dashboard where users (patients) can book appointments with doctors. The form typically includes fields like department selection, doctor choice, appointment date, and user details. This feature allows users to request medical appointments directly through the platform, ensuring quick access to healthcare professionals. The clean and guided interface makes the booking process user-friendly and efficient.

Contact Us

The screenshot shows a web browser window with the URL 127.0.0.1:8000/GetInTouch. The page has a dark header with a logo and navigation links: Home, Log in, Register. The main content area is titled "Contact" and includes a sub-header: "If you have any issue and suggestion please contact". On the left, there are three contact options: Location (caregroup Garden Karachi PC: 75300), Call Us (+92 222 4594 117), and Email Us (sehrishahid78@gmail.com). On the right, there is a contact form with fields for "Your Name", "Your Email", "Subject", and "Message", followed by a "Send Message" button. The footer contains the Care Group logo, address (Garden Center Karachi, PC: 75300), phone number (+92 222 4594 117), email (sehrishahid78@gmail.com), and social media icons. It also features a table of links categorized into Useful Links, Our Services, Preventions, and Cures.

Useful Links	Our Services	Preventions	Cures
Home	Diabetes	Healthy Diet	Medication
About us	Hypertension	Regular Exercise	Surgery
Services	Asthma		Therapy

The contact page provides users a way to reach platform administrators or support. Whether it's to resolve technical issues or submit general inquiries, this form helps bridge communication. It typically includes fields for name, email, and message. Having a clear contact option adds credibility and reliability to the system. It also supports user feedback and continuous improvement.

FINAL NOTE

This project, CareGroup, isn't just another health management system—it's a fully functional, role-based platform designed to streamline patient care, doctor interaction, and admin control. Whether it's booking appointments, managing records, or keeping everything organized on the backend, this application gets the job done cleanly and efficiently. Overall, it's a solid demonstration of how modern web apps can simplify healthcare operations while keeping the user experience smooth and intuitive. That's a wrap!
